

In re Patent Application of:  
**PALM ET AL.**  
Serial No. 09/117,219  
Filed: JULY 24, 1998

---

**In the Claims:**

Please amend the above-identified application as follows:

Claim 1 (cancelled)

Claim 2 (previously presented) A computer, comprising:

- a. a processor,
- b. a memory, and
- c. a stereo viewer loaded in memory, said stereo viewer including a graphical user interface including a viewing window in which wireframes can be viewed with and without texture and a plurality of controls for manipulating a wireframe, a wireframe's texturing or a view of a wireframe in which said plurality of controls includes one or more controls for controlling positioning of the neutral plane of a stereo image.

Claim 3 (previously presented) A computer, comprising:

- a. a processor,
- b. a memory, and
- c. a stereo viewer loaded in memory, said stereo viewer including a graphical user interface including a viewing window in which wireframes can be viewed with and without texture and a plurality of controls for manipulating a wireframe, a wireframe's texturing or a view of a wireframe in

---

which said plurality of controls includes one or more controls for adjusting camera offset between points acting as cameras for providing left and right image views of a wireframe.

Claim 4 (previously presented) The computer of claim 5 in which said plurality of controls includes one or more controls for animating a wireframe.

Claim 5 (previously presented) A computer, comprising:

- a. a processor,
- b. a memory, and
- c. a stereo viewer loaded in memory, said stereo viewer including a graphical user interface including a viewing window in which wireframes can be viewed with and without texture and a plurality of controls for manipulating a wireframe, a wireframe's texturing or a view of a wireframe in which said plurality of controls includes one or more controls for selecting display of a wireframe either unrendered or rendered with one of a bit mapped texture from an image used to create the wireframe or a selected surface texture.

Claim 6 (original) The computer of claim 5 in which when said wireframe is rendered with a selected surface texture, the wireframe is presented as if the surface texture were illuminated from a source of illumination.

---

Claim 7 (previously presented) The computer of claim 5 in which said plurality of controls includes one or more controls for positioning a wireframe.

Claim 8 (original) The computer of claim 7 in which said plurality of controls includes at least one control for restoring a wireframe to a default position.

Claim 9 (previously presented) The computer of claim 5 in which said plurality of controls includes at least one control for selecting between a stereo view and a non-stereo view of a wireframe.

Claim 10 (original) The computer of claim 5 in which said plurality of controls includes one or more controls for magnifying or reducing the size of the wireframe.
